

CODY MUMFORD

Software Developer

405.627.5175 • codymumford@quantum-matrix.xyz • github.com/Quantumheart

PROFESSIONAL SUMMARY

Software Engineer with 6+ years of experience building full-stack web applications in .NET and Angular across healthcare and energy sectors. Proven track record of delivering scalable services, optimizing performance, and shipping features in regulated environments.

SKILLS

Programming	C#, JavaScript, TypeScript, Dart, Java, C++
Web	HTML, CSS, Blazor, Angular
Frameworks	.NET, Piral, ASP.NET, Flutter
Database	SQL Server, PostgreSQL, EF Core, SQLite
DevOps	Git, Azure DevOps, GitHub Actions, Kubernetes, Docker, IIS
Tools	Visual Studio, JetBrains Products, VSCode (GitHub CoPilot), Claude Code, Pi, Ollama
OS	Windows, Linux, macOS

WORK EXPERIENCE

Homecare Homebase — Software Engineer II

Remote / Aug 2022 – Present

.NET, WinForms, Blazor, Piral, SQL Server, Git, Azure DevOps, Visual Studio, Kubernetes, Docker

- Built and maintained scheduling, billing, and compliance features in the BackOffice WinForms desktop application used by home health and hospice agencies nationwide.
- Migrated legacy Windows Forms to modern rails leveraging Copilot with 100% feature parity for the web frontend and GraphQL backend.
- Delivered Blazor micro-frontend components within the Piral framework, enabling modular feature rollouts across the customer-facing web application.
- Architected and deployed containerized web services (Kubernetes, IIS, WCF) packaged as NuGet libraries consumed by multiple in-house applications.
- Maintained and updated SQL change scripts and stored procedures to meet CMS regulatory requirements and product guidelines.
- Managed end-to-end build and deployment of customer databases, services, and back-office applications.

Land Information Services — Software Developer

OKC, OK / Aug 2019 – July 2022

.NET Core, Angular, SQL Server, Git, Visual Studio

- Designed and implemented Angular components and services powering user-facing forms backed by .NET Core REST APIs.
- Built Web API endpoints for converting oil industry abstraction models into downloadable Excel workbooks and PDFs.
- Optimized Excel workbook generation by 30% using JetBrains dotTrace and dotMemory to profile and refactor data access methods.
- Implemented user authentication using .NET Core, Microsoft Identity, and IdentityServer4.
- Developed a .NET Core Worker Service for asynchronous document download integration.

PROJECTS

Kohera — Cross-Platform Matrix Chat Client

github.com/Quantumheart/Kohera • kohera.quantum-matrix.xyz

Flutter, Dart, Matrix SDK, SQLite, Docker, GitHub Actions, WebRTC

- Built and released a full-featured Matrix chat client with end-to-end encryption, cross-signing, and key backup using Rust-based Vodozmac bindings.
- Engineered adaptive layouts (mobile, tablet, desktop) with a Discord/Slack-style space rail, rich message rendering, WebRTC calling, and OpenGraph link previews.
- Shipped to Web, Linux, and Windows with CI/CD via GitHub Actions; containerized web deployment with Docker on GHCR.

EDUCATION

Oklahoma City Community College

2017 – 2019

Associate of Science, Computer Science — GPA 3.0
